New York Society of Professional  
Engineers

Jeff is President, co-founder and Senior Principal Engineer at Insite. With a vision to provide superior engineering design coupled with unparalleled customer service, Jeff and his partner Nick started Insite in 1989. Since the firm's inception, Jeff's leadership has resulted in the firm's continued growth and success.

In addition to overseeing day to day operations, Jeff is responsible for project management, planning, permitting, plan and specification preparation, and construction oversight for selected residential, commercial, and municipal projects. Jeff has served a wide array of clientele including private developers, regional institutions, local municipalities, county governments and private landowners. With over 35 years of experience, Jeff's ability to navigate the permitting process while leading his design teams to develop cost-effective and cutting edge designs, routinely results in successful projects for Insite's clients.

Jeff's work in the New York City watershed is extensive, and this experience provides keen insight into sewer and stormwater management solutions for projects in the region. The advanced design techniques and program requirements associated with this work provides Insite with a diverse array of project solutions.

### PROJECT HIGHLIGHTS

#### *East of Hudson Watershed Corporation – Stormwater Retrofits (Throughout Putnam and Westchester Counties)*

- Insite is currently providing a full array of surveying, engineering, and landscape architectural services on over a dozen stormwater retrofit projects in the NYCDEP watershed. Jeff has managed projects from initial planning and analysis through construction oversight. Each project presents a unique design challenge that requires solutions that wins support from a diverse group of stakeholders.

#### *Patterson Crossing – Retail Center: Patterson, NY*

- Insite guided the 400,000 sf retail center through the permitting process providing site engineering, surveying, and landscape architectural services. Jeff managed the design and permitting services involving consulting on user site needs and site construction planning.

#### *Vassar Brothers Medical Center – Campus Expansion: Poughkeepsie, NY*

- Insite handled all site civil and landscape architectural design for the design/build project. Jeff managed the campus wide site improvements from planning through construction.

#### *Somers Realty – Mixed Use Development: Somers, NY*

- Insite provided site engineering, surveying and landscape architecture services on several portions of the project. Insite has assisted with the construction completion of the first two phases of the project comprised of 150 units of housing, and related infrastructure improvement.
