Nick is co-founder, Senior Vice President and Senior Principal Land Surveyor who oversees all aspects of the professional land surveying and mapping services offered by Insite. Over 25 years ago, Nick and his partner Jeff started Insite to offer their clients the highest level of professional design with unparalleled customer service.

With over 46 years of experience in the land surveying field, much of Nick’s experience is specifically targeted at surveying applications as they relate to civil engineering projects in both the public and private sectors. In addition to overseeing day to day operations, Nick manages a team of in-house personnel and field crews performing work throughout the tri-state area.

Through his years of experience, Nick has become a respected member throughout the surveying community often consulted for specialized surveying projects. Recently Nick has been responsible for monitoring historic buildings at West Point as they underwent foundation reconstruction, monitoring seasonal and annual movement in area bridges, and surveying for local airports.

Nick remains on the forefront of technology executing numerous projects in the metropolitan area utilizing global positioning system surveying and is responsible for implementation and integration of GIS related services for Insite.

PROJECT HIGHLIGHTS

Hamlet at Pawling: Pawling, NY

- Insite provided the multi-family project with an ALTA Survey, survey construction support and preparation of survey as-builts. Nick managed all aspects of the survey tasks meeting tight time frames and complicated title requirements.

Putnam Hospital Center: Carmel, NY

- Insite has supported the hospital with topographic and boundary surveys of the entire facility over the course of numerous expansion projects including additional land acquisition.

Boyce Thompson Center: Yonkers, NY

- Insite provided surveying for an innovative mixed use urban development. Nick managed project surveying support services from initial site surveying for design through construction.

College of Mount St. Vincent: Bronx, NY

- Insite provided topographic and boundary surveying for numerous individual campus improvement projects including utility mapping. Nick managed all surveying tasks for the 60 acre campus.
